Cancellation Policy: Items canceled after commencement of exhibitor move-in will be charged at 100% of full rental price.

Lead Retrieval Provided By

Ver 2.1209

Super Small Lead Retrieval Scanner For the Data Connectors conferences

Here's how it works...

Scanner

This scanner is a small battery powered barcode reader, about the size of a keychain. Every person attending the conference completes a registration form. Then, our registration team enters the information from these forms, and provides a badge for the attendee. This badge also has a barcode, which uniquely identifies that attendee. During the show, your staff simply scans the badge of each person who visits your booth.

Customized Demographics

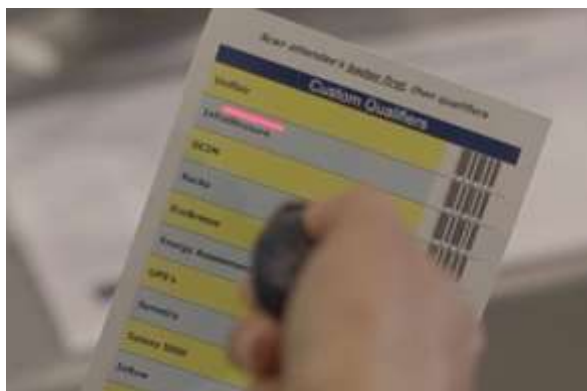

Optionally, we provide you with a scan sheet, containing fourteen barcodes you can assign any of your products or services attendees can express interest in. You will scan each attendee's badge barcode first, then the barcodes from as many items on the scan sheet as you would like. These "action codes" are listed beneath each attendee on your list. Match your scanned product with a code assigned to a specific product, service, sales territory, follow-up timeline, etc.

MS Excel Formatted File

After the show, we will send you a file containing the full contact data from each scanned attendee's registration form, including Name, Title, Company, Address, Phone, Fax Number and E-mail address, in Excel format. The Excel Formatted File allows you to instantly import your scanned contacts into virtually any application for further analysis and/or processing, such as your contact management system or any word processor.

In order for you to quickly begin following up on the contacts you met at the show, your scanned data file will be e-mailed to you immediately following the conference.

If you have any questions about the use of the scanner, or would like to discuss ideas for customizing your data collection at the show, please call us at **(503) 750-8205**.
